

## Managed SD-WAN

AireSpring Global Managed SD-WAN includes industry-leading VMware SD-WAN by VeloCloud, our carrier-grade Global Private Network (GPN) with distributed PoPs, and last mile circuit procurement, all monitored and supported, through our global NOCs. And everything is included within a single contract, and one simple bill.

### **Simplified WAN deployment, monitoring and management**

AireSpring provides fast, scalable, and reliable, global connectivity, for on-premises and public/private multi-cloud application performance. Our centralized management and control use simple, template-driven workflows that eliminate tedious, error-prone configurations. Our cloud-based SD-WAN makes it easy to add new remote offices and connect directly to cloud services, with zero-touch deployment.

### **Deep end-to-end network control**

AireSpring Global Managed SD-WAN embeds application intelligence, enabling deep packet inspection by the network, beyond source and destination. It understands the application requirements and the context associated with the applications, and delivers fast, reliable and secure application delivery, regardless of network conditions.

### **Flexible WAN circuits for cost-effective application performance and reliability**

AireSpring reduces bandwidth costs, by aggregating multiple connections of any type, like Broadband, DIA Internet, MPLS, wireless 4G, etc. Leveraging all available bandwidth, and automatically adapting to network conditions, AireSpring directs traffic to the best path at any moment in time. This increases application reliability, and provides a quality user experience.

### **Single-vendor managed service gives you the control without the headaches**

AireSpring enables healthcare businesses to support more traffic and ensure applications run smoothly, without being adversely affected by underlying network issues. Our managed service enables IT to spend less time dealing with networks complexities, and have more time and focus applied to business applications and services.

A photograph of a male doctor in a white lab coat with a stethoscope around his neck. He is sitting at a desk, looking at a laptop screen. He is also holding a clipboard with a pen. The background shows a blurred office setting with shelves and binders.

# AireSpring Global Managed SD-WAN Benefits for Healthcare

Healthcare facilities, such as hospitals, care centers, doctor's offices, pharmacies and clinics, and their clients/patients rely upon critical applications over the WAN. Healthcare providers send patient records, schedule physicians and facilities, archive digital images, support telemedicine, and much more.

Healthcare organizations are realizing the many benefits of using cloud and SaaS services and accessing apps over the Internet for patient records and billing systems. They use the Internet to share information and communicate between physicians, care providers, administrators and patients. Keeping healthcare data secure is of utmost importance. In fact, it is a HIPAA requirement to support secure and reliable access to patient records.

Telehealth enables remote patient and clinician contact, care, advice, education, monitoring, remote admissions, and more. Telehealth uses the WAN to support real-time videoconferencing and streaming media. To support a quality user experience, the WAN must have appropriate quality of service (QoS).

Healthcare applications are powerful and sophisticated, and the Internet infrastructure supporting them is now a critical component. Ensuring the reliable and fast delivery of these applications is critical to the success of any healthcare organization.

## The AireSpring Global Advantage™

- **Access a Global Private Network:**  
Bypass the unpredictability of the internet over long distances using our reliable, high performance Global Private Network.
- **Extend your global footprint:**  
Obtain internet connectivity into locations that are heavily regulated by using direct border gateway protocol (BGP) peering to all Tier 1 Carriers.
- **Scale and grow with ease:**  
Activate and deploy new sites and services in days, anywhere in the world, and rapidly scale bandwidth as your needs change.
- **Expand bandwidth cost-effectively:**  
AireSpring can procure and manage connectivity to your global locations. Our AireNMS Link Monitoring solution provides 24/7 proactive monitoring, troubleshooting and repair provided by our global network operations center (NOC).
- **Multi-Cloud Connect:**  
Enhanced, secure private connections from AireSpring Gateways to leading Cloud providers, such as AWS, Azure and Google.
- **Secure your end-to-end network traffic:**  
Gain access to a highly secure network using a combination of our secure Global Private Network and VMware SD-WAN by VeloCloud's PCI verified and compliant solution.
- **Complete Visibility:**  
Monitor and configure your network using our sophisticated web-based SD-WAN portal.
- **Fully Managed Service:**  
Benefit from AireSpring's premium implementation, design and engineering services.
- **Reduce costs:**  
Keep costs low and simplify branch office complexity.
- **Personalized Service:**  
AireSpring delivers outstanding customer service, featuring one bill and a single point of contact for all your service needs.

*AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."*
