

## Managed SD-WAN

AireSpring Global Managed SD-WAN includes industry-leading VMware SD-WAN by VeloCloud, our carrier-grade Global Private Network (GPN) with distributed PoPs, and last mile circuit procurement, all monitored and supported, through our global NOCs. And everything is included within a single contract, and one simple bill.

### **Simplified WAN deployment, monitoring and management**

AireSpring provides fast, scalable, and reliable, global connectivity, for on-premises and public/private multi-cloud application performance. Our centralized management and control use simple, template-driven workflows that eliminate tedious, error-prone configurations. Our cloud-based SD-WAN makes it easy to add new remote offices and connect directly to cloud services, with zero-touch deployment.

### **Deep end-to-end network control**

AireSpring Global Managed SD-WAN embeds application intelligence, enabling deep packet inspection by the network, beyond source and destination. It understands the application requirements and the context associated with the applications, and delivers fast, reliable and secure application delivery, regardless of network conditions.

### **Flexible WAN circuits for cost-effective application performance and reliability**

AireSpring reduces bandwidth costs, by aggregating multiple connections of any type, like Broadband, DIA Internet, MPLS, wireless 4G, etc. Leveraging all available bandwidth, and automatically adapting to network conditions, AireSpring directs traffic to the best path at any moment in time. This increases application reliability, and provides a quality user experience.

### **Single-vendor managed service gives you the control without the headaches**

AireSpring enables manufacturers to support more traffic and ensure applications run smoothly, without being adversely affected by underlying network issues. Our managed service enables IT to spend less time dealing with networks complexities, and have more time and focus applied to business applications and services.

A man in a white lab coat and safety glasses is standing in a factory, looking at a tablet. He is holding a tablet in his left hand and pointing at a control panel with his right hand. The background shows industrial machinery and a factory floor.

# AireSpring Global Managed SD-WAN Benefits for Manufacturers

Manufacturing facilities can be located globally, with corporate offices and distributed manufacturing facilities, branch offices and regional data centers. While network quality varies from one location to another, operations in remote or rural areas present the greatest challenge. With manufacturing processes dependent upon critical ERP systems, manufacturers can't afford a slow or unreliable WAN, that leads to downtime and inevitably, loss of user productivity and revenue.

Manufacturers face increasing global supply chain complexities, technologies like IoT, artificial intelligence, real-time production line monitoring systems, and tech-savvy competition. Today's Internet-connected world places greater pressure on traditional remote sites with traditional WANs that can't keep up with cloud and mobile technologies. They lack reliable cloud access, agile and responsive connectivity, and cost-effective bandwidth.

Using converged voice and data applications to communicate internally, and with customers and suppliers, requires reliable network connectivity. AireSpring Global Managed SD-WAN makes applications run faster, safer, and more reliably. We deliver a quality user experience for all applications.

## The AireSpring Global Advantage™

- **Access a Global Private Network:**  
Bypass the unpredictability of the internet over long distances using our reliable, high performance Global Private Network.
- **Extend your global footprint:**  
Obtain internet connectivity into locations that are heavily regulated by using direct border gateway protocol (BGP) peering to all Tier 1 Carriers.
- **Scale and grow with ease:**  
Activate and deploy new sites and services in days, anywhere in the world, and rapidly scale bandwidth as your needs change.
- **Expand bandwidth cost-effectively:**  
AireSpring can procure and manage connectivity to your global locations. Our AireNMS Link Monitoring solution provides 24/7 proactive monitoring, troubleshooting and repair provided by our global network operations center (NOC).
- **Multi-Cloud Connect:**  
Enhanced, secure private connections from AireSpring Gateways to leading Cloud providers, such as AWS, Azure and Google.
- **Secure your end-to-end network traffic:**  
Gain access to a highly secure network using a combination of our secure Global Private Network and VMware SD-WAN by VeloCloud's PCI verified and compliant solution.
- **Complete Visibility:**  
Monitor and configure your network using our sophisticated web-based SD-WAN portal.
- **Fully Managed Service:**  
Benefit from AireSpring's premium implementation, design and engineering services.
- **Reduce costs:**  
Keep costs low and simplify branch office complexity.
- **Personalized Service:**  
AireSpring delivers outstanding customer service, featuring one bill and a single point of contact for all your service needs.

*AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."*
